Bi-Weekly Weighted Average Report for the Week Ending

12/08/12

This report for the week ending 12/08/11 will be the final report released this year. Therefore, the next published report will be on January 9, 2013.

Compared to two weeks ago: Overall trading this period was light as sellers are waiting until after the first to the year to move inventories. Plus, buyers are hesitating to make any purchases at current prices as expectations are for the market to soften first quarter of 2013. Feed grade corn prices trended mostly steady on limited trading. Demand for current ship appeared to be light to moderate. Prices on soybeans were steady to weak on moderate demand for light to moderate offerings. Supplies look to be limited, especially on Food grade quality. Limited movement was noted on Wheat at generally steady prices. Alfalfa hay in California Good/Premium grade \$280.00. Oregon Alfalfa small square Supreme quality 275.00; Good/Premium 250.00, Meadow grass small square Premium grade 175.00.. All hay prices are reported on a per ton bases.

Prices negotiated spot market, FOB the farm and reported with a weighted average. Prices quoted \$/bushel, except soybean meal (\$/ton and FOB the mill) and roasted soybeans, \$/ton. Hay reported FOB the stack or barn unless otherwise noted. Soybean oil, sunflowers, spelt, cents/lb.
